Science Park High School is a name of greatness, being a Charger comes with an insurmountable amount of prestige and respect everywhere you go. It's a fair assessment to say that the Class of 2019 is deserving of every last bit of this reputation. As we not only embody the excellence of what it is to be a Science Park Charger, we strive in various areas that go far beyond the academic world: we are activists, musicians, athletes and in essence, the future.

Other than being not only one of the greatest classes to grace the Science Park building, the Class of 2019 marked the beginning of remarkable activities and common factors that brought us all together. Whether it be the start of the convocations that helped bring our issues to light, finessing every Nimcyzk and Patiak packet right before the period, starting up the tradition of junior class shirts (because we did THAT), or even hosting the most lit parties that the school has had (or at least, as lit as you can get at school), our class has managed to take everything and make it our own: making it the best because well, we are the best.

Even through the ups and downs, and we have had many, we were able to become a tight knit family. The Class of 2019 banded together to form a platform of support and celebration for every accomplishment that an individual had achieved. There is no doubt in my mind that the individuals from the Class of 2019 will always prevail through anything that they set their minds to, and always have the support of fellow classmates through their journeys.

With the incomparable merit, determination and passion that the Class of 2019 holds within our student body, it is definite that we will leave our mark on the world. As our time in high school comes to an end, it marks the end to an era of greatness that we will continue to carry throughout our lives. With the skills that we have obtained throughout our four years together, we will continue to serve as the epitome of the same prestige and respect that Science students uphold as we become doctors, lawyers, teachers, and anything that we dream to be. Preparing to take on the world together, we will take in our hearts what we are so proud to be: Science Park Chargers, forever and always.

To the Class of 2019;

Time flies so fast! We just can't believe how quickly four/six years have gone by. We remember meeting with you in your freshmen year as you were waiting to embark on this high school journey with different dreams and aspirations. But no matter where you started, we are proud of your accomplishments and it has been a privilege to watch you grow and learn.

We are confident that you will continue to climb and strive for excellence as you have done during these past four years. Remember to never stop trying, never stop learning and live life to the fullest, always give your best in everything you do.

Congratulations! All the best for your future! Happy Graduation.

CONGRATULATIONS

Congratulations to you, the class of 2019!

You have reached a milestone in your academic career, and for that, you should be proud. The last four (and for some of you, six) years have served as a base upon which you will build your future. I am confident that the knowledge and skills you have acquired here at Science Park have prepared you for the rigors of a college program of study.

Be firm in your commitment to academic excellence; let the pillars of community, honor, peace, and truth guide you into becoming well-rounded individuals capable of making this world a better place.

We can never be sure of what the future holds for us. But I can say this with certainty: Your time here at Science Park High School has provided you with all the necessary tools to shape a future filled with success.

Best of luck!
Kathleen Tierney
